CONTENTS

Special Issue: The Link between Experiments and the Molecular Dynamics of Macroscopic and Mesoscopic Systems - A Collection of Invited Papers in Honour of Professor Claude Bröt.

Molecular dynamics simulation of conformational equilibrium of 1,2-dichloroethane
C. Millot and J.L. Rivail (Vandoeuvre lès Nancy, France).....1

Low-frequency Raman spectra of fluorobenzene in the liquid state
O. Faurskov Nielsen, C. Fajolles, P.-A. Lund (Copenhagen, Denmark) and E. Praestgaard (Roskilde, Denmark).....13

The Poley absorption problem
A.I. Burshtein (Novosibirsk, USSR) and J. Mc Connell (Dublin, Ireland).....21

The group theory of molecular diffusion and chemical reactions in the liquid state of matter
M.W. Evans (Egham, Gt. Britain).....41

Dielectric relaxation of propylene glycol-water solutions from 10MHz to 10GHz
E. Tombari (Pisa, Italy), G. Chryssikos (Athens, Greece), B. Gestblom (Uppsala, Sweden) and R.H. Cole (Providence, RI, U.S.A.).....53

On the relationship between macroscopic and single-particle orientational correlation functions in polar liquids
Y.P. Kalmykov and S.V. Limonova (Moscow, USSR).....71

A Fokker-Planck study of Raman band shapes of chemically reactive liquids: comparison of phenomenological models
P. Viot, S. Bratos and G. Tarjus (Paris, France).....93

On the Rayleigh dissipation function for dielectric media
B.K.P. Scaife (Dublin, Ireland).....101

Y.P. Kalmykov and S.V. Limonova (Moscow, USSR).....71

A Fokker-Planck study of Raman band shapes of chemically reactive liquids: comparison of phenomenological models
P. Viot, S. Bratos and G. Tarjus (Paris, France).....93

On the Rayleigh dissipation function for dielectric media
B.K.P. Scaife (Dublin, Ireland).....101

Far infrared spectra of octyl and nonyl cyanobiphenyl liquid crystals
J.K. Vij and U.M.S. Murthy (Dublin, Ireland).....109

The reaction field in continuum models and molecular statistical theories of dielectric fluids
W. Schröer (Bremen, F.R.G.).....125

On the quantitative theory of dielectric spectra in polar liquids
V.I. Gaiduk, T.A. Novscova and V.V. Brekhovskikx (Moscow, USSR).....147

On the solution of the Smoluchowski equation by the method of successive approximations: application to the dynamics of a dipole in a cavity in a dielectric medium
W.T. Coffey (Vienna, Austria).....173

A comparative study of collision induced absorption, dielectric constant and refractive index of CCl_4 and CS_2 in the liquid phase as a function of pressure and temperature
Ph. Marteau, J. Obriot (Villetaneuse, France), R. Occelli (Marseille, France), T.K. Bose, A. Gherfi and J.M. St. Arnaud (Trois-Rivières, Que., Canada).....193

Contribution to the study of the structure of a complex non rigid molecule in the liquid phase: case of nematic para-azoxyanisole
F. Volino, D. Galland, A.J. Dianoux (Grenoble, France) and B. Ferreira (Lisbon, Portugal).....215

Infrared absorption spectral moments and mean squared torques of linear molecules mixed in rare gases
C. Dreyfus (Paris, France)..... 241

Intramolecular and external rotation in liquids: Raman and Rayleigh light scattering experiments on phenyl and pyridyl compounds
F. Nikomanis, D. Samios and T. Dorfmüller (Bielefeld, F.R.G.).....271

Collision induced contributions on Rayleigh and Raman allowed spectra from fluids composed of linear molecules: a comparison between experimental and computer simulation results
R. Frattini (Venice, Italy), M. Sampoli and R. Vallauri (Florence, Italy).....293
